PROFESSIONAL EXPERIENCE

Software Developer, NexGen **Jan 2023 to Dec 2023**

Digital Pasal: inventory, store-credit, and payments platform for small retailers.

- Delivered accounts and payments features that supported Digital Pasal scaling from about 10 to 30 to 40 active retail shops, by building and shipping 10+ REST API endpoints across three client-facing modules using Java, Spring Boot, and Spring Data JPA within a six-person Agile team.
- Cut average API response time by 30 percent and database round trips by more than 40 percent, by refactoring service and data access layers to remove N+1 query patterns in Hibernate and MySQL.
- Reduced the open bug backlog by about 40 percent, by resolving 15+ defects during QA and pre-production while integrating backend APIs with React frontend components across three product modules.
- Sustained about 80 percent unit-test coverage with JUnit 5 and Mockito, catching regressions before release, by validating service-layer business rules independently of the database and contributing through Git pull requests, Jira, and weekly code reviews.

Flutter Developer Intern, Technobyte **Dec 2021 to Mar 2022**

- Shipped Flutter user interface features in Dart across three mobile releases, by integrating MySQL-backed REST services and building reusable components.
- Resolved 10+ QA-reported defects and post-release fixes, by consuming and testing REST API endpoints, handling JSON responses and error states across multiple screens, and coordinating with a cross-functional team through structured QA handoff.

PROJECTS

Ledger-Core, Banking Backend REST API **Jan 2026 to Present**

Java 21, Spring Boot, Spring Security, PostgreSQL, Redis, Apache Kafka, Kubernetes, Flyway, JUnit 5, Docker, GitHub Actions

Repository: github.com/anishbasnetAB/ledger-core | Live demo: ledger-core-frontend-anish.vercel.app

- Achieved zero duplicate postings and fully balanced ledgers across 1,000 concurrent transfers over real HTTP against PostgreSQL (16 parallel workers, 50 requests deliberately replayed three times each), by enforcing idempotency keys with a database-level UNIQUE constraint and BigDecimal money handling.
- Kept account balances correct under concurrent load, by implementing double-entry bookkeeping, an append-only ledger enforced at the database level, ACID transactions, and optimistic locking in Java 21 and Spring Boot.
- Secured the API with Spring Security login and signup, JWT authentication, and role-based access control, and added a scheduled reconciliation job that verifies stored balances against the ledger.
- Built event-driven ledger processing with an Apache Kafka producer that publishes only after the database transaction commits and idempotent consumers using atomic inserts, and added a Redis balance cache with rate limiting that degrades safely when Redis is unavailable.
- Deployed a 3-replica Kubernetes (k3s) setup on AWS EC2 with health-gated zero-downtime rolling updates, containerized with Docker, versioned the schema with Flyway, and shipped through a GitHub Actions CI/CD pipeline backed by 50+ JUnit 5 and Mockito tests covering rollbacks, duplicate transfers, and concurrent withdrawals.

TECHNICAL SKILLS

Backend: Java 21, Spring Boot, Spring Data JPA, Spring Security, Hibernate, REST APIs, API design, microservices, Object-Oriented Programming (OOP)
Frontend: React, TypeScript, JavaScript, HTML, CSS
Data & Messaging: PostgreSQL, MySQL, Redis, Apache Kafka, relational database design, Flyway, JSON
Testing & DevOps: JUnit 5, Mockito, unit testing, Docker, Kubernetes, GitHub Actions, CI/CD, AWS, Maven
Languages: Java, Python, SQL, TypeScript, Dart
Methodologies: Agile, Scrum, code review, Git, GitHub, Jira, Linux
AI Assisted Dev: GitHub Copilot, Claude Code

EDUCATION

Postgraduate Diploma, Computer Software Engineering **Jan 2024 to Dec 2025**

Lambton College, Ontario, Canada

BSc (Honours) Computer Science, First-Class Honours **Jan 2019 to Sep 2022**

London Metropolitan University, United Kingdom

CERTIFICATIONS

AWS Certified Cloud Practitioner, Amazon Web Services | Issued July 2026
