ANISH BASNET

SOFTWARE DEVELOPER | JAVA | C#/.NET | NODE.JS | REACT | AWS

+1 437-955-1764 | theanishbasnet@gmail.com | anishbasnet.com | linkedin.com/in/theanishbasnet | github.com/anishbasnetAB

PROFESSIONAL SUMMARY

Software Developer building full-stack and backend systems across REST APIs, relational data models, and modern frontends. Hands-on with Java, Spring Boot, C#/.NET, and Node.js on the backend and React 18/TypeScript on the frontend, plus a C++20 systems project achieving 1.6M+ orders per second throughput at sub-microsecond latency. Delivered 10+ production endpoints, reduced average API latency by 30%, and hold the AWS Certified Cloud Practitioner certification. **Authorized to work in Canada without employer sponsorship (PGWP).**

TECHNICAL SKILLS

Backend	Java, Spring Boot, Spring Data JPA, Hibernate, C#, ASP.NET Core, Entity Framework, Node.js, REST APIs
Frontend	React 18, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Razor Pages
Data & Messaging	PostgreSQL, MySQL, Redis, Redis Pub/Sub, Kafka (basics), Flyway
Testing & DevOps	Docker, Docker Compose, GitHub Actions, CI/CD, AWS, JUnit 5, Mockito, GoogleTest
Languages	Java, C#, C++20, JavaScript, TypeScript, SQL, Python
Methodologies	Git, Postman, Agile/Scrum, code review, requirements analysis
AI Assisted Dev	GitHub Copilot, Claude Code, Cursor, ChatGPT

PROFESSIONAL EXPERIENCE

NexGen Jan 2023 to Dec 2023

Internship (Jan to Apr 2023) progressing to Junior Developer (May to Dec 2023)

- Delivered 10+ REST API endpoints for three client-facing modules using Java and Spring Boot on an Agile team of six.
- Modeled and queried relational data with JPA and Hibernate against MySQL, supporting three production modules.
- Refactored service and data access layers to remove N+1 query patterns using Spring Boot, cutting average API latency by 30% and database round trips by more than 40%.
- Wrote and maintained JUnit 5 and Mockito automated tests reaching 80%+ unit test coverage, documented through peer code reviews.

Technobyte Dec 2021 to Mar 2022

Flutter Intern

- Built Flutter UI features for three mobile releases in Dart, integrating REST APIs and resolving 10+ QA reported defects.
- Coordinated fixes with a cross-functional team through structured QA handoff, writing reusable Dart components based on user feedback.

PROJECTS

Ledger-Core, Banking REST API Jan 2026 to Present

Java 21 · Spring Boot · PostgreSQL · Flyway · JUnit 5 · Docker · GitHub Actions

- Designed and built a Java 21 and Spring Boot REST API for account management, ledger postings, and reconciliation on PostgreSQL, validating 1,000 automated transfer attempts with zero duplicate postings.
- Added 50+ automated JUnit 5 and Mockito tests and a Docker based GitHub Actions CI/CD pipeline covering build, test, and deployment.

GitHub | Live Demo

Trading Exchange Simulator May to Jun 2026

C++20 · Node.js/Fastify · React 18/TypeScript · Redis Pub/Sub · Docker Compose

- Designed and implemented a C++20 order matching engine achieving 1.6M+ orders per second throughput with p50 latency of 583ns and p99 latency of 958ns, validated with 11 GoogleTest unit tests at 100% pass rate.
- Built a Node.js/Fastify service layer and a React 18/TypeScript dashboard with authentication, login, and session security, using Redis Pub/Sub for real-time updates and Docker Compose for deployment.

CERTIFICATIONS

AWS Certified Cloud Practitioner, Issued July 2026

EDUCATION

Postgraduate Diploma, Computer Software Engineering, Lambton College, Ontario Jan 2024 to Aug 2025

BSc (Hons) Computer Science, First-Class Honours, London Metropolitan University, UK Jan 2019 to Sep 2022
