ANISH BASNET

Java Backend Developer • Spring Boot & PostgreSQL • C++ Systems
Mississauga, ON · theanishbasnet@gmail.com · linkedin.com/in/theanishbasnet · github.com/anishbasnetAB

PROFESSIONAL SUMMARY

Java backend developer with a BSc in Computer Science (First Class Honours) and hands-on experience building production-grade REST APIs, service-layer business logic, and database-backed systems with Java, Spring Boot, PostgreSQL, Spring Data JPA/Hibernate, Flyway, and JUnit/Mockito. Built Ledger-Core, a banking API demonstrating ACID transactions, optimistic-locking concurrency control, double-entry bookkeeping, idempotent transfers, and automated reconciliation. Also brings C++ systems depth from a trading exchange achieving 1.6M orders/sec. Actively uses AI tools — Claude Code, OpenAI Codex, ChatGPT, Perplexity, MCP servers, and agentic workflows — daily to research solutions, accelerate delivery, and improve code quality. Valid PGWP — no sponsorship required.

SKILLS

Java Backend: Java 21, Spring Boot, Spring Data JPA, Hibernate, Spring MVC, REST APIs, Service-Layer Design, Flyway, Maven, OOP, Design Patterns, SOLID

Testing & Data: JUnit 5, Mockito, AssertJ, PostgreSQL, MySQL, MongoDB, Redis, ACID Transactions, Optimistic Locking, SQL/NoSQL, Relational Design

AI Tools & LLMs: Claude Code, OpenAI Codex, ChatGPT, Perplexity, MCP Servers, AI Agents, Prompt Engineering, Agentic Workflows, Cursor, GitHub Copilot

DevOps & Cloud: Docker, Docker Compose, GitHub Actions CI/CD, AWS (fundamentals), Azure (fundamentals), Git, Linux, React 18, TypeScript, Node.js, Postman

C++ / Systems: C++20, CMake, GoogleTest, STL, Concurrency, Lock-Free Data Structures, GDB, Valgrind

PROJECTS

Ledger-Core — Spring Boot Banking API — Java 21 · Spring Boot · PostgreSQL · JPA/Hibernate · Flyway · JUnit 5 · Mockito · Docker
Personal Project | 2026 | Deployed on Render | Live Demo | GitHub

- Production-style money-movement REST API: ACID transactions with guaranteed rollback, optimistic-locking concurrency control (10-thread concurrent withdrawal test), double-entry ledger with append-only audit trail enforced by a DB trigger, idempotent transfer APIs, and an automated reconciliation engine that recomputes balances from the immutable ledger and flags drift. Schema managed with Flyway; correctness proven with failure-injection, concurrency, and idempotency test suites. Deployed on Render + Neon PostgreSQL.

Real-Time Distributed Trading Exchange Simulator — C++20 · Node.js · Fastify · React 18 · Redis · PostgreSQL · Docker · GitHub Actions
Personal Project | May 2026 | Deployed | Live Demo | GitHub

- C++20 matching engine — 1,626,655 orders/sec · p50 583ns · p99 958ns · 11 GoogleTest unit tests. Fastify microservice backend, JWT auth, Redis Pub/Sub event streaming, WebSocket real-time React 18 dashboard, atomic PostgreSQL transactions, Docker Compose, GitHub Actions CI.

PROFESSIONAL EXPERIENCE

NexGen | *Junior Software Developer* | Jul 2023 — Nov 2023

- Built REST controllers, service-layer logic, and database-connected features using Java, Spring Boot, and SQL under senior developer guidance.
- Integrated backend APIs with React.js frontend components, wrote SQL queries, and participated in code reviews and Agile workflows using Git, Jira, and pull requests.

NexGen | *Software Developer Intern* | Jan 2023 — Jun 2023

- Assisted in building full-stack features using Java, Spring Boot, React.js, and SQL — contributed to REST API endpoints, CRUD operations, and service-layer updates in an Agile team.

Leapfrog Technology | *Student Partner* | Jan 2022 — Dec 2022

- Strengthened practical engineering skills through industry-oriented training in React.js, Node.js, collaborative workflows, peer reviews, and iterative software development practices.

Technobyte | *Flutter Intern* | Dec 2021 — Mar 2022

- Developed mobile features with Flutter and MySQL-backed backend services across design, testing, and issue resolution.

EDUCATION

BSc Computer Science, First Class Honours | London Metropolitan University · Jan 2019 – Sep 2022
Postgraduate Diploma — Computer Software Engineering | Lambton College · Jan 2024 – Aug 2025
