ANISH BASNET

Junior Software Developer · Java & Spring Boot · REST APIs & Full Stack
Mississauga, ON · theanishbasnet@gmail.com · anishbasnet.com · linkedin.com/in/theanishbasnet · github.com/anishbasnetAB

PROFESSIONAL SUMMARY

Junior Software Developer with a **BSc in Computer Science (First Class Honours)** and 1+ year of professional experience building REST APIs and backend services using **Java 21, Spring Boot, PostgreSQL, and JPA/Hibernate**. Built production-style systems including a Spring Boot banking API with ACID transactions and a distributed trading exchange simulator processing 1.6M orders/sec. Skilled in JUnit 5, Mockito, Docker, GitHub Actions CI/CD, React 18, and TypeScript. **Valid PGWP — no sponsorship required.**

TECHNICAL SKILLS

Backend:	Java 21, Spring Boot, Spring MVC, Spring Data JPA/Hibernate, Flyway, Maven, REST APIs, Microservices, Node.js
Frontend:	React 18, TypeScript, JavaScript (ES6+), HTML5, Tailwind CSS, Responsive Web Design
Data & Messaging:	PostgreSQL, MySQL, MongoDB, Redis, Kafka, SQL, ACID Transactions, Relational Design, NoSQL
Testing & DevOps:	JUnit 5, Mockito, AssertJ, TDD, Docker, Docker Compose, GitHub Actions CI/CD, AWS (fundamentals), Linux
Languages:	Java 21, C++20, Python, TypeScript, JavaScript, SQL
Methodologies:	OOP, SOLID, Code Reviews, Agile/Scrum, Jira, Git, Postman
AI-assisted Dev:	GitHub Copilot, ChatGPT, Claude Code, Cursor

PROJECTS

Ledger-Core — Spring Boot Banking API Jan 2026 – Present | Live Demo | GitHub

Java 21 · Spring Boot · Spring Data JPA · PostgreSQL · Flyway · JUnit 5 · Mockito · Docker · GitHub Actions

- Designed and implemented a production-style financial REST API with clean service-layer architecture, handling account management, fund transfers, and automated reconciliation.
- Implemented ACID transactions with guaranteed rollback and optimistic-locking concurrency — stress-tested with 10 concurrent threads, achieving 0 overdrafts and 0 duplicate charges on 1,000 retries.
- Built a double-entry ledger with DB-enforced append-only audit trail and idempotent transfer APIs using Spring Data JPA/Hibernate and PostgreSQL.
- Wrote 50+ unit and integration tests across 5 suites (JUnit 5, Mockito) covering failure injection, concurrency, and idempotency; managed 8 Flyway schema migrations; deployed on Render + Neon PostgreSQL.

Real-Time Distributed Trading Exchange Simulator May 2026 – Jun 2026 | Live Demo | GitHub

C++20 · Node.js · TypeScript · React 18 · Redis Pub/Sub · PostgreSQL · Docker Compose · GitHub Actions

- Built a C++20 high-performance matching engine processing 1,626,655 orders/sec with p50 latency of 583ns and p99 of 958ns; validated with 11 GoogleTest unit tests at 100% pass rate.
- Developed a Node.js/Fastify REST microservice backend handling ~3,000 req/sec with JWT auth, Redis Pub/Sub event streaming, and atomic PostgreSQL transactions.
- Implemented a React 18 TypeScript dashboard consuming real-time order data via REST APIs; orchestrated 4 services with Docker Compose and automated builds with GitHub Actions CI/CD.

PROFESSIONAL EXPERIENCE

NexGen · Junior Software Developer Jan 2023 – Dec 2023

Internship (Jan – Apr 2023) progressing to Junior Developer (May – Dec 2023)

- Developed and shipped 10+ REST API endpoints and service-layer features using Java, Spring Boot, Spring Data JPA/Hibernate, and SQL within a 6-person Agile team.
- Integrated backend APIs with React.js frontend components across 3 product modules; debugged and resolved 15+ defects during QA and pre-production, reducing the bug backlog by ~40%.
- Maintained >80% unit test coverage with JUnit 5 and Mockito; wrote documented code and participated in weekly code reviews using Git, Jira, and pull request workflows.

Leapfrog Technology · Student Partner Jan 2022 – Dec 2022

- Completed structured industry training in React.js, Node.js, and JavaScript; practiced peer code reviews and iterative development across team exercises.

Technobyte · Flutter Intern Dec 2021 – Mar 2022

- Developed mobile UI features integrating Flutter frontends with MySQL-backed REST services; resolved QA defects across 3 feature releases.

EDUCATION

BSc Computer Science, First Class Honours London Metropolitan University · Jan 2019 – Sep 2022

Postgraduate Diploma — Computer Software Engineering Lambton College · Jan 2024 – Aug 2025
